CUSHIONING

VARIO REBOUND Technology

We combine our proven individual and weight-adapted SECURA VARIO® heel shock absorption with intelligent rebound properties. In the heel area, proven standard PU material stabilizes and absorbs the energy at the heel touchdown. In the midfoot and forefoot area, the midsole material with rebound effect returns a very high part of the energy spent by the wearer. In addition, the outsole made of soft TPU optimizes the power transmission in the step sequence. Combined with the SECURA VARIO® system, this achieves optimal damping and a safe stance.
