UNCOMPROMISING SAFETY FOR EVERY STEP.

STULTZ SECURA
SAFETY FOOTWEAR

STEITZ SECURA PLUS

GLOBALLY UNIQUE TECHNOLOGIES FOR YOUR HEALTH

1 VITAL BACK SYSTEM

Our vital back system protects your back and musculoskeletal system thanks to heel cushioning that is individually adjusted to your weight.

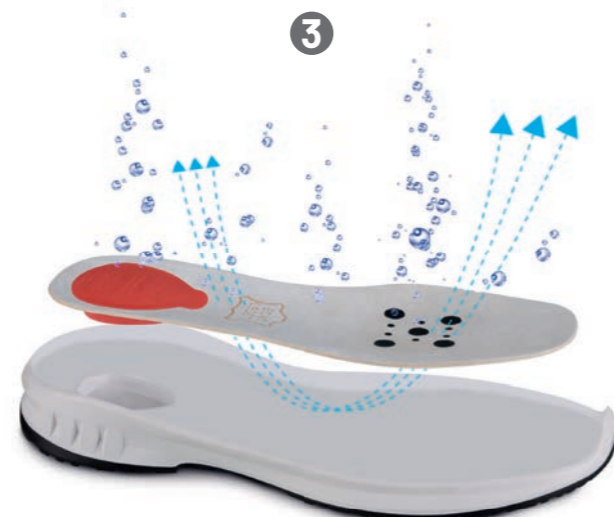

2 THE FITTING SYSTEM

With our fitting system, we offer up to 4 widths for every shoe size. This ensures a perfect fit while providing exceptional comfort and stability.

3 FOOT CLIMATE TECHNOLOGY

Natural materials and a sophisticated ventilation structure ensure the ideal feel-good temperature for your feet. Our genuine leather insole helps you feel comfortable all day long.

Our safety shoes are not only comfortable to wear, they also reduce the risk of accidents. Those wearing our safety shoes can fully concentrate on their work, become more efficient and have significantly less downtime.

NEW LADIES BOOT

The VX 7620 DA BOA GORE VF is built for durability and all-weather performance. Featuring a GORE-TEX membrane, this safety boot ensures waterproof protection while maintaining breathability. The BOA® Fit System allows for a quick, secure fit, while the reinforced TPU toe guard adds extra abrasion resistance. With a Perbunan Active outsole, it provides flexibility, stability, and excellent grip, making it ideal for demanding work environments.

METATARSAL PROTECTION

The FL 640 GORE BOA SMC S7 combines maximum functionality with a high level of comfort. The specially shaped toe cap prevents injury while maintaining agility. The Perbunan Florian outsole provides optimal grip even on rough terrain. The BOA fastening system makes it quick and easy to put on and take off. GORE-TEX technology prevents water from entering the shoe, ensuring it remains completely waterproof.

CK 640 GORE BOA SMC VF

EN ISO 20345:2024 S7S HI CI M SC SR HRO FO

Sizes: 36 - 52
 Widths: S, NB, XB, XXB
 Outsole: Perbunan CK ESD, grey
 Cushioning: SECURA® VARIO

The CK 640 GORE BOA SMC VF combines light-weight flexibility with high-impact protection. Featuring a composite toe cap and SECURA META COVER, it offers full forefoot protection while maintaining agility. The BOA® Fit System ensures a precise, secure fit whilst the Perbunan CK ESD outsole provides enhanced grip and flexibility. Thanks to its GORE-TEX membrane, this boot is waterproof as well as highly breathable - making it the perfect choice for all-day comfort in demanding environments.

GAME-CHANGING TECHNOLOGIES

FOR ULTIMATE SAFETY AND PERFORMANCE

EXTRAGUARD

Enjoy the revolutionary features of the completely unique and sustainable EXTRAGUARD upper technology for safety footwear. Whether it is extensive rain, mud or snow, the lightweight, quick re-drying, vegan and chromium-free EXTRAGUARD upper technology upgrades the comfort and protection of GORE-TEX safety footwear to a new level - in any situation, no matter the weather and even after months of heavy use.

BOA® FIT SYSTEM

The BOA® Fit System offers high-performance fit solutions that are perfectly tailored to the respective area of use. It consists of three main components: twist lock, rope and rope guides.

1
 TWIST LOCK

Allows quick opening and closing. Adjusts the fit with precision.

2
 ROPE

Lightweight, hard-wearing and specially configured for maximum performance.

3
 ROPE GUIDES

Low-friction rope guides ensure smooth-running closure.

THE BOA® LIFETIME GUARANTEE

FIT FOR LIFE WITH BOA®:
 BOA® twist locks and ropes are guaranteed for the lifetime of the product on which they are integrated.

NEW STYLES

DURO GUARD

The new DURO GUARD series has been developed for a wide range of work areas and combines proven STEITZ SECURA features with innovative functionality. Robust leather styles are suitable for heavy-duty use, while lightweight microfibre versions are ideal for warehouses and production facilities. For even more comfort and safety, some styles are equipped with the BOA® Fit System - for quick on and off, millimetre-precise adjustment and a permanently secure fit, without the need for traditional laces. In addition, the styles in the DURO GUARD series are equipped with a VF insole that offers textile puncture resistance. Furthermore, the SECURA VARIO system with weight-dependent replaceable cushioning modules in the heel area ensures individually tailored comfort and optimal cushioning with every step.

#EXTRAGUARD

DG 9800 GTX VF

DIN EN ISO 202345:2024 S7S HI CI SR HRO FO LG

Sizes: 36 - 50 | Widths: S, NB, XB, XXB | Outsole: Perbunan Multiflex, anthracite
Cushioning: SECURA® VARIO

METAL-FREE

The DURO GUARD series is designed without steel or aluminium toe caps. This makes them completely metal-free - and noticeably lighter. As a sustainable alternative, they feature the ECO-Cap made from recycled ocean plastic. It reliably withstands impact forces, providing a robust and eco-friendly solution.

MICROFIBRE UPPER

Some styles of the DURO GUARD series feature a lightweight, waterrepellent microfibre upper.

LEATHER UPPER

Some styles in the DURO GUARD series are equipped with high-quality leather. It keeps the foot breathable and comfortably dry even in wet conditions. Selected styles also feature a GORE-TEX® lining, providing complete water-proof protection.

TOE GUARD

The microfibre styles of this series feature a newly developed ceramic toe guard, which reliably protects the upper material from abrasion and damage. The leather styles have a durable TPU overcap in the toe area, which also ensures a high level of protection and durability.

CLOSURE SYSTEMS

Whether traditional lacing, STEITZ FLEXO, or the BOA® Fit System - every option ensures a secure fit and superior comfort.

NEW OUTSOLE

PERBUNAN MULTI FLEX

With the newly developed PERBUNAN MULTI FLEX sole, STEITZ SECURA introduces an outsole that combines durability with high flexibility. It is designed to optimally support natural movement and at the same time increase comfort during everyday work.

The highlight of the sole is the integrated flex zone in the forefoot joint area. A softer, more flexible rubber material is used here, while the rest of the sole is made of firmer rubber. This intelligent combination of different materials ensures targeted flexibility, noticeable relief for the joints and maximum comfort, whether walking or standing.

The coarse-treaded outsole guarantees excellent slip resistance on a wide variety of surfaces and gives the sole its distinctive, secure stability. In combination with the proven STEITZ SECURA multi-width system, the PERBUNAN MULTI FLEX sole actively contributes to injury prevention and long-lasting well-being. The new outsole is being used for the first time in the styles of the DURO GUARD series - for comfort, safety and stability at the highest level.

DURO GUARD

MICROFIBRE UPPER

The microfibre styles of the DURO GUARD series are noticeably lighter - making them ideal for jobs that involve prolonged walking or standing. The upper material is resistant to water and yet breathable. Different closure options allow you to choose the shoe that best suits your individual preferences.

#EXTRAGUARD

WATER PROOF #EXTRAGUARD

The lightweight, quick-drying, vegan and chrome-free EXTRAGUARD upper material from our partner GORE-TEX® takes comfort, protection and sustainability to a whole new level. Thanks to its innovative structure, the material remains permanently lightweight - even when wet. It dries quickly and is particularly easy to care for. At the same time, it reduces heat loss, ensures a comfortable foot climate and impresses with its durability. EXTRAGUARD thus stands for modern wearing comfort, functional protection and sustainable performance.

DIN EN ISO 20345:2024

DEFINITION OF THE NEW STANDARD FOR PERSONAL PROTECTIVE EQUIPMENT

Since 2022, a new standard for personal protective equipment has redefined safety requirements and increased transparency. Since November 2024, new safety shoes placed on the market must be certified according to DIN EN ISO 20345:2022 or DIN EN ISO 20345:2024. Products previously certified under DIN EN ISO 20345:2011 may continue to be sold until their five-year certification period expires.

At STEITZ SECURA, we fully comply with these regulations - and see it as our responsibility to keep you clearly informed about these changes. Because true safety arises from the combination of high-quality products and comprehensive understanding.

CHANGES

→ New description puncture resistance

-  Resistance to puncturing using textile tested with a 3 mm nail
-  Resistance to puncturing using textile tested with a 4,5 mm nail

→ New protective categories

- S6** like S2, but additionally waterproof
- S7** like S3, but additionally waterproof
